Important Information/Reminders

**WARNING:** The iCOquit® Smokerlyzer® device is for individual use. Do not share your device with anyone to lower the risk of cross-contamination.

**CAUTION:** Never use alcohol or cleaning agents containing alcohol or other organic solvents as these vapours will damage the carbon monoxide sensor inside the iCOquit®.

**CAUTION:** Do not use hand-sanitising products containing alcohol when using the device as this may damage the sensors.

**CAUTION:** Use of accessories not approved by the manufacturer will invalidate the warranty and may compromise the functionality of the device.

**NOTE:** Once the iCOquit®’s battery has become flat, the iCOquit® will need to be disposed of, please see disposal guidance in Disposal of Device section.
About this Manual

The User Manual provides instructions on how to operate iCOquit® Smokerlyzer® monitor and the iCOquit® app. It contains relevant information about the monitor, its uses and its care, including step-by-step instructions with screens and illustrations.

Definitions

**WARNING:** indicates a potentially hazardous situation, which, if not avoided, may result minor or moderate injury.

**CAUTION:** indicates a potentially hazardous situation, which, if not avoided, may result in damage to the device.

**NOTE:** used to call attention to notable information that should be followed during use.

Compliance

iCOquit® Smokerlyzer® is CE marked according to the Medical Device Directive 93/42/EEC.

Please refer to the ‘Safety Information’ section of this manual for more information on the compliance of the iCOquit® Smokerlyzer®.

Warnings

1. Hands should be washed regularly in accordance with infection control practice.

2. Please do not attempt to modify the equipment in any way or use accessories not specified by the manufacturer. Any attempt to do so will invalidate the warranty and may compromise the safety of the device.

Cautions

1. Never use alcohol or cleaning agents containing alcohol or other organic solvents as these vapours will damage the carbon monoxide sensor inside the iCOquit®.

2. Do not use hand-sanitising products containing alcohol when using the device as this may damage the sensors.

3. Use of accessories not approved by the manufacturer will invalidate the warranty and may compromise the functionality of the device.
Contraindications

Carbon Monoxide CO sensors work by oxidising the target gas (CO). Once CO has been oxidised, the sensor creates an electrical output directly proportional to the level of CO present at that time, this is then displayed as a reading on your device screen in PPM (parts per million). Sometimes, other gases can interfere with this and cause unwanted reactions; we commonly refer to this as ‘cross-sensitivity’. Alcohol is one of those compounds which can potentially cause an unwanted reaction with the sensor and result in unreliable readings, therefore we strongly advise against our devices being cleaned with alcohol based substances and that you do not use a CO monitor if you have recently consumed alcohol, and wait approximately a minimum of 13 hours before you do a test with your iCOquit® device (alcohol can be detectable on your breath up to 13 hours after drinking according to a well-established drug and alcohol testing manufacturer2. Breath alcohol has been shown by a small study by E Groman (“Can carbon monoxide analysers be fuelled by alcohol intake?”) that breath alcohol can have an impact on CO sensor readings¹.

Intended Use/Indications

The iCOquit® Smokerlyzer® breath carbon monoxide (CO) monitor is intended for single person use by individuals wanting to measure the amount of CO on their breath in the home environment, as a motivational aid to help them in their attempt to stop smoking. The iCOquit® can also be used by healthcare professionals with individuals in smoking cessation programmes and research.

The iCOquit® smartphone/tablet application will guide the user through the process of providing a breath sample for measurement. After the breath test, results can be shared via email and social media and stored in a results graph to show progress.
Instrument Layout

1. Breath sample port
2. On/pairing button
3. LED light ring/pairing light
4. Information label including serial number
5. Breath exhaust

Installation and Set-up

Downloading the iCOquit® app

App can be downloaded from the App Store or Google Play.

Connecting the iCOquit® device

To connect the device to the app, push the pairing button when instructed to. A blue light will flash once to show pairing is complete.

NOTE: This can take up to 5 seconds and will only pair once initiated from within the iCOquit® app.
User Interface

Splash Screen

The splash screen shall display upon starting the app. The splash screen shall disappear once the app has successfully loaded.

Sign in Screen

1. Email Address field.
2. Password field.
3. Forgotten Password button, starts a new forgotten password process.
4. Sign In Button, starts the authentication process.
5. Register button, starts the user registration process.
Dashboard/Home Screen

1. Hamburger menu button, this will open the menu.

2. The first dashboard shows the users latest CO PPM reading.
   a. Information overlay appears on a tap gesture which provides result description.

3. The second dashboard shows days until quit date or if quit date has been reached, it will show number of days smoke-free.

4. The last dashboard shows amount of money user has saved.

5. Results tab will navigate user to results graph.

6. Dashboard tab will navigate user to dashboard.

7. Breath Test Tab will navigate the user to the first breath test page if it is not the active tab.
Breath test

Using the iCOquit®

User Authentication and Registration

Authentication Screen Options

a. If the user already has an account they will need to complete the authentication fields and tap the ‘Sign In’ Button.

b. If the user is already a user, but has forgotten their authentication credentials, the user will need to tap the ‘Forgotten Password’ Button.

c. If the user is not currently a registered user they will need to tap the ‘Register’ Button.

1. Press the breath test icon
2. Follow the steps on the iCOquit® app.
Completing the Forgotten Password Process

1. The user will provide the email address they completed registration with and then tap the ‘Submit’ button.

2. The 9 digit password reset verification code will have been sent to the users’ mailbox. The user will then need to tap the ‘Submit’ button.
3. The last step is to provide a new password and rewrite that password and then tap the ‘submit’ button.

After the new password has been submitted, the app will return to the sign-in page.

Completing the Registration Process

1. The user will need to complete the user profile section of the registration process. This will involve:
   a. Providing a name.
   b. Providing their age.

Once this has been completed the user will need to tap the ‘Update’ Button.
2. The second part of the registration process is providing the users smoking habits. This will involve:

a. Providing the number of cigarettes smoked per day.
b. Providing the cost for a pack of 20 cigarettes.
c. Providing the number of hours before the users’ first cigarette.
d. Planned quit date

e. Planned quit date & time

Once this has been completed the user will need to tap the ‘Update’ Button.

3. The final section of the registration process is providing details for authentication and consents. This will involve:

a. Providing a valid email address.
b. Providing a password for authentication.
c. Agreeing to terms and conditions.
d. Agreeing to the privacy statement.

Once the user has provided the required information they will need to tap the ‘Continue’ button.
4. The user will then be navigated back to the sign in screen. The user must wait for their confirmation email before attempting authentication. The user must tap the link in the email to confirm their email address. After this the user will be authenticated and can return to the app and sign in using the details registered.

Tabbed Navigation Pages

1. The tabbed navigation allows navigation between three pages; Dashboard, Breath Test and Results the selected item will be highlighted as dark blue while the unselected/non-active items will be grey.

a. To navigate to the Dashboard tap ‘Dashboard’. The dashboard provides an overview of the users smoking cessation progress.
b. To start a new breath test, tap the ‘Breath test’ Button. The breath test tab will display the hygiene warning and allow the user to start a new breath test, by tapping the ‘Continue’ button.

c. To view historic breath test results, the user will need to tap the ‘Results’ button. The results are in date order with the latest reading displayed from the left and oldest reading displayed furthest to right.
Connecting to an iCOquit® device

1. The Bluetooth scanning phase will show a spinner while searching for a device.

2. If an iCOquit® device has been found and successfully connected to, a tick shall be shown to indicate a successful connection between the smart device and iCOquit®.
3. If an iCOquit® device has not been found or was unable to successfully connect, a retry icon shall appear indicating connection has failed, but tap the icon to try again.

Completing a breath test

Breath Test Initialisation

1. The first screen prompts the user to initiate the breath test. To do this the user will need to tap the ‘New Breath Test’ Button.
Inhale Instructions

2. As prompted onscreen, take a deep breath.

Hold Instructions

3. As prompted onscreen, hold your breath until the countdown timer has finished.

4. If the 15 second inhalation countdown is unattainable, begin exhaling when ready and the device will begin measuring breath sample.
Exhale Instructions

5. Do not cover vent hole of device when performing a breath test.

6. As prompted on screen, exhale.

Interpreting the breath test result

1. Breath test result interpretation chart
   a. Green = Low CO PPM Reading
   b. Yellow = Moderate CO PPM Reading
   c. Red = High CO PPM Reading

Once a breath test has been completed the user will be navigated to this screen where they will see their CO PPM result.
Completing the Smoking Habits Questions

1. The user will need to complete the input fields relating to their smoking habits. This will involve:

   a. Confirming whether they are still an active smoker.
   b. Providing how many cigarettes they are actively smoking per day.
   c. Providing the duration before the first cigarette of the day.
   d. The day they quit or the day they anticipate quitting.
   e. The time they quit or the time they anticipate quitting.

Once the user has completed the questions, they should tap the ‘Continue’ Button.
2. Once the answers have been provided and the user has tapped the ‘Continue’ button, they will be provided with a result, which informs them of their smoking status. There are four results:

a. Non-Smoker  
b. Light-Smoker  
c. Moderate-Smoker  
d. Heavy Smoker

Navigation drawer menu options

1. The navigation drawer contains seven menu items which can be navigated to upon tapping an item in the navigation drawer. The menu options are:

a. Dashboard  
b. Manage Profile  
c. iCOquit® Smokerlyzer® Device  
d. Frequently asked Questions  
e. iCOquit® Manual  
f. About iCOquit®  
g. Delete Account  
h. Sign Out
Edit Personal Details

1. A user can navigate away by tapping the back button symbol.

2. A user can adjust their personal details by editing the form fields.

Once a user has finished making changes they will need to tap the ‘Update’ button.

Edit Smoking Habit Details

1. A user can navigate away by tapping the back button symbol.

2. A user can update their smoking habit details by editing the form field.

Once the user has made their changes they will need to tap the ‘update’ button.
Device Details Page

Perquisite: The user must complete the device connection process upon navigating to this screen.

1. A user can navigate away by tapping the back button symbol

2. Upon successfully navigating to the device details screen, device details about the connected device will appear. These device details include:
   a. Connection Status
   b. Device Serial Number
   c. Device UUID
   d. Battery Life Remaining
   e. Firmware Version
   f. Number of tests the device has conducted
   g. iCOquit® Activation Date

NOTE: Once the iCOquit®'s battery has become flat, the iCOquit® will need to be disposed of, please see disposal guidance in Disposal of Device section.
Frequently Asked Questions

1. The user can navigate away from the page by tapping the back button symbol.

2. Upon navigating to the page, a web view will appear which will display the iCOquit® support web page. The user will be able to navigate support articles on the web page within the app.

About iCOquit® page

1. The user can navigate away from the page by tapping the back button symbol.

2. Upon navigating to the page, the user will be provided with information on the iCOquit®.
**Delete Account**

1. The user can navigate away from the page by tapping the back button symbol.

2. Upon navigating to the page, the user will need to tap the ‘Delete Account’ button to confirm they want to delete their account.

3. The user will then be presented with a dialog box to check that the input was not an error. To confirm that the user wants to delete their account, they will need to tap ‘yes’ else they will need to tap ‘no’

Upon a user deleting their account, all stored data will be removed.

**Sign Out**

1. The user can navigate away from the page by tapping the back button symbol.

2. Upon navigating to sign out a dialog will appear. If the user taps ‘yes’ this signs the user out and navigates them to the authentication page, else if they tap ‘No’ the user will be navigated back to the user dashboard and will not be signed out.
**Troubleshooting**

*Cannot connect the iCOquit® Smokerlyzer® to the app*

- Make sure Bluetooth is enabled on your smart device
- Battery may be flat

**NOTE:** Once the iCOquit®’s battery has become flat, the iCOquit® will need to be disposed of, please see disposal guidance in Disposal of Device section.

*Network Error Occurred*

- Please make sure you are connected to the internet

*Precautions to be taken in the event of changes in the performance of the iCOquit® Smokerlyzer®*

- Leave in clean, dry area with fresh air (free from VOCs) for 24hrs

*Precautions to be taken regarding the exposure of the iCOquit® to reasonably foreseeable environmental conditions*

- Leave in clean, dry area with fresh air (free from VOCs) for 24hrs

*What if I can’t hold my breath for the recommended 15 second breath hold time?*

- Bedfont® recommends that if you are unable to hold your breath for the recommended 15 seconds, to hold your breath for 10 seconds before exhaling into the device.

If any of these issues persist, please contact Bedfont® or its distributors

**Cleaning**

1. The iCOquit® Smokerlyzer® product is moulded with ABS and PC plastic, which is easy to keep clean.

2. After you have finished using the iCOquit® Smokerlyzer® to obtain your results, wipe the outside of the device with a lightly damp cloth, ensuring not to allow any water to enter the breath or exhaust ports in the device.

3. **NEVER** use alcohol or cleaning agents containing alcohol or other organic solvents as long-term exposure to these vapours will damage the CO sensor inside.
4. Under no circumstances should the instrument be immersed in liquid or splashed with liquid.

5. Please store in a dry location, keeping the device free from lint and dust to keep the device clean and clear from blockage.

6. Please keep the device out of direct sunlight to keep the device away from any unnecessary exposure to heat and light.

No additional maintenance or service required.

EMC Table/Environment

**WARNING:** Portable RF communications equipment (including peripherals such as antenna cables and external antennas) should be used no closer than 30 cm (12 inches) to any part of the iCOquit® Smokerlyzer including cables specified by the manufacturer. Otherwise, degradation of the performance of this equipment could result. This equipment should be moved if necessary, to avoid interference.

**Guidance and manufacturer’s declaration: Electromagnetic Immunity (IEC 60601-1-2)**

The iCOquit® Smokerlyzer® is intended for the use in the electromagnetic environment specified below. The customer or the user of the iCOquit® Smokerlyzer® should assure that it is used in such an environment.

### Notes:

*A:

Field strengths from fixed transmitters, such as base stations for radio (cellular/cordless) telephones and land mobile radios, amateur radio, AM and FM radio broadcast and TV broadcast cannot be predicted theoretically with accuracy. To assess the electromagnetic environment due to fixed RF transmitter, an electromagnetic site survey should be considered. If the measured field strength in the location in which the iCOquit® is used exceeds the applicable RF compliance level above, the iCOquit® should be observed to verify normal operation. If abnormal performance is observed, additional measures may be necessary, such as re-orienting or relocating the iCOquit®.
Warranty

Bedfont® Scientific Limited warrants the iCOquit® Smokerlyzer® product to be free of defects in materials and workmanship for a period of 500 tests or 6 months, whichever is first, from the date of shipment. Bedfont’s sole obligation under this warranty is limited to repairing or replacing, at its choice, any item covered under this warranty when such an item is returned, intact and prepaid, to Bedfont® Scientific Limited or the local representative. The warranty is automatically invalidated if the product is repaired, altered, labels removed or otherwise tampered with by unauthorised personnel, or have been subject to misuse, neglect or accident.

Disposal of Device

The iCOquit® Smokerlyzer® must be disposed of responsibly, please contact your local Bedfont® distributor where you purchased the iCOquit® Smokerlyzer® or your local authority for details of where and how you can return this item for environmentally safe recycling.
